Key statistics

Between the weeks ending 1 and 15 October 2022:

- Payroll jobs, up 0.4%
- Total wages, down 2.5%

Wages see increased seasonality into October due to the payment of periodic bonuses in multiple industries in September.

Update of employer characteristics

The source of employer characteristics has been updated in this release, resulting in revisions to all industry, employment size and sector indexes. These revisions are greater in 2022 and impact component indexes differently. For more information, see the [Update of characteristics variables \(/methodologies/weekly-payroll-jobs-and-wages-australia-methodology/week-ending-15-october-2022#update-of-employer-characteristics\)](/methodologies/weekly-payroll-jobs-and-wages-australia-methodology/week-ending-15-october-2022#update-of-employer-characteristics) section of the Methodology.

The ABS recommends that analyses of previously published estimates be refreshed with the data from this release.

Guide to labour statistics

To learn more about our different labour measures, their purpose and how to use them, see our new [Guide to labour statistics \(/statistics/understanding-statistics/guide-labour-statistics\)](/statistics/understanding-statistics/guide-labour-statistics). It provides summary information on labour market topics including [Industry employment \(/statistics/understanding-statistics/guide-labour-statistics/industry-employment-guide\)](/statistics/understanding-statistics/guide-labour-statistics/industry-employment-guide) and [Earnings data \(/statistics/understanding-statistics/guide-labour-statistics/earnings-guide\)](/statistics/understanding-statistics/guide-labour-statistics/earnings-guide).

Factors affecting interpretation

These estimates are not seasonally adjusted. Seasonality can affect the interpretation of change in payroll jobs and wages, particularly between sub-annual periods. While annual comparisons can assist in understanding underlying change, they are less useful when events such as public holidays or pandemic lockdowns don't occur in the same week in both years.

In addition, when comparing the change in payroll jobs and wages between any two periods, interpretation can be complicated by variations in their composition. Payroll job indexes are compiled from over 11 million jobs and variations in the types of jobs reported can result in compositional change (which is not quantified). For example, each payroll job in each week:

- is counted in the same way regardless of job status (full-time, part-time or casual), hence variations in demand for casual staff can influence week-on-week change.
- represents an individual in every paid job reported via STP, hence jobholders working multiple jobs are counted more than once. While multiple jobholders account for less than 10% of all payroll jobs, they can increase the rate of change seen week-to-week (in

some industries) in circumstances where they are unable to work in any of their jobs (e.g. due to illness) and are not paid when absent.

Wages can be more heavily influenced by week-to-week change in composition, as the wages index reflects movements in aggregate wages and salaries paid (unlike the ABS Wage Price Index which presents changes in the price of labour unaffected by compositional shifts in the labour force, hours worked or employee characteristics). Variability in wages indexes in this release in any given week may be due to:

- changes in hours worked,
- the inclusion of cyclical payments such as bonuses, commissions or lump sum payment of leave loading,
- payment of penalty rates for public holidays (which may not fall on the same date each year), or
- the inclusion of irregular payments such as overtime, ad hoc or one-off payments relating to employee recognition or enterprise agreement sign-on.

Compositional change can also differ at the industry or state and territory level, particularly when there are localised labour market issues.

Alternative period comparisons

The combination of seasonal effects and differences in composition can increase the volatility of week-on-week or month-on-month changes in these estimates. For these reasons, the ABS recommends using comparisons of the current month to the same month in the previous year, or 3 months prior, to understand any trends in the payroll jobs and wages estimates presented. These comparisons will likely reduce the impact of seasonal factors and compositional change, making trends easier to identify.

Earnings guide

To learn more about the different labour measures available, their purpose and how to use them, see our [Earnings guide \(/statistics/understanding-statistics/guide-labour-statistics/earnings-guide\)](/statistics/understanding-statistics/guide-labour-statistics/earnings-guide).

Revisions

This release sees higher than usual revisions in July 2022, as the 16 week imputation retention threshold passes through this period. These revisions mostly reflect the removal of previously imputed records, with the receipt of more complete data. Users should exercise caution when referring to estimates around this period.

Change periods

This release presents percentage change between the weeks ending 15 October 2022 and:

- 1 October 2022, for fortnight
- 17 September 2022, for month
- 16 October 2021, for year

This differs for employment size estimates which are month lagged.

National

In the fortnight to 15 October 2022:

- Payroll jobs increased by 0.4%, compared to a decrease of 0.7% in the previous fortnight
- Total wages paid decreased by 2.5%, compared to a decrease of 3.1% in the previous fortnight

Percentage change in payroll jobs and total wages

	Fortnight (%)	Month (%)	Year (%)
Payroll jobs	0.4	-0.3	4.1
Total wages	-2.5	-5.5	6.0

Estimates of change throughout this release are calculated using un-rounded index values. They may be different from, but are more accurate than, movements obtained from the rounded index values.

Payroll jobs and total wages index (a)(b)

a. Indexed to the week ending 14 March 2020.

b. Payroll jobs and wages data during June and July see a greater variation in business payroll reporting around the end of financial year. For more information, see [Variation in revisions in Data variability and revisions \(/methodologies/weekly-payroll-jobs-and-wages-australia-methodology/week-ending-15-october-2022#data-variability-and-revisions\)](#).

State and territory

Payroll jobs

All geographical areas in this release represent the residential address of the jobholder.

In the fortnight to 15 October 2022, the largest changes in payroll jobs were:

- Queensland, up 0.8%
- Western Australia and Victoria, both up 0.5%

Percentage change in payroll jobs, by state and territory

	Fortnight (%)	Month (%)	Year (%)
New South Wales	0.2	-0.5	4.6
Victoria	0.5	0.0	7.5
Queensland	0.8	-0.4	1.3
South Australia	0.1	-0.3	1.1
Western Australia	0.5	0.0	1.7
Tasmania	0.0	-0.3	1.7
Northern Territory	0.4	-0.4	1.2
Australian Capital Territory	0.2	-0.2	8.3
Australia	0.4	-0.3	4.1

Monthly percentage change in payroll jobs, by state and territory

Loading map...

Total wages

In the fortnight to 15 October 2022, the largest changes in total wages paid were:

- New South Wales, down 3.4%
- Western Australia, down 2.6%

Percentage change in total wages, by state and territory

	Fortnight (%)	Month (%)	Year (%)
New South Wales	-3.4	-8.3	6.2
Victoria	-2.5	-4.7	8.1
Queensland	-1.6	-4.9	4.2
South Australia	-2.0	-3.8	4.6
Western Australia	-2.6	-2.5	4.9
Tasmania	-1.3	-2.6	4.7
Northern Territory	-0.7	-1.4	3.9
Australian Capital Territory	-1.1	-2.3	7.7
Australia	-2.5	-5.5	6.0

Sub-state - payroll jobs

Time series estimates of payroll jobs by sub-state regions (Statistical Area 4 (SA4), Statistical Area 3 (SA3) and Greater Capital City Area (GCCSA) regions) are presented as index values in Table 5 of the Data downloads.

For more information on the geography used in this release, see the [Glossary \(/methodologies/weekly-payroll-jobs-and-wages-australia-methodology/week-ending-15-October-2022#glossary\)](/methodologies/weekly-payroll-jobs-and-wages-australia-methodology/week-ending-15-October-2022#glossary).

Monthly percentage change in payroll jobs, by GCCSA regions

Loading map...

The ACT only has one GCCSA region for the entire Territory.

Sex and age group

Indexes of persons aged 15-19 years old by sex can be affected by a higher proportion of records with unknown sex than other age groups. For more information, see the Update of jobholder characteristics in the historical [Methods review \(/methodologies/weekly-payroll-jobs-and-wages-australia-methodology/week-ending-12-february-2022#methods-review\)](/methodologies/weekly-payroll-jobs-and-wages-australia-methodology/week-ending-12-february-2022#methods-review).

Payroll jobs

In the fortnight to 15 October 2022, the largest changes in payroll jobs were:

- worked by females, up 0.5%
- worked by persons aged 15-19, up 2.7%

Percentage change in payroll jobs, by sex and age group (a)

		Fortnight (%)	Month (%)	Year (%)
Sex	Males	0.0	-0.6	-0.8
	Females	0.5	-0.4	2.5
Age group (years)	15-19	2.7	-0.1	13.0
	20-29	0.7	-0.1	7.3
	30-39	0.2	-0.2	3.1
	40-49	0.3	-0.5	1.7
	50-59	0.1	-0.4	1.3
	60-69	0.0	0.0	3.6
	70 and over	0.1	-0.3	6.0
All persons		0.4	-0.3	4.1

a. Persons with 'unknown' sex and age are only included in the calculation of All persons indexes. For more information, see Inclusion of unknown characteristics in [How data are processed \(/methodologies/weekly-payroll-jobs-and-wages-australia-methodology/week-ending-15-october-2022#how-data-are-processed\)](#).

Payroll jobs by sex (a)

a. Indexed to the week ending 14 March 2020.

Total wages

In the fortnight to 15 October 2022, the largest changes in total wages paid were:

- worked by males, down 2.8%
- worked by persons aged 40-49, down 3.2%

Percentage change in total wages, by sex and age group (a)

		Fortnight (%)	Month (%)	Year (%)
Sex	Males	-2.8	-6.4	2.6
	Females	-2.3	-4.8	7.4
Age group (years)	15-19	-0.2	3.1	21.3
	20-29	-1.0	-2.6	10.4
	30-39	-2.9	-6.0	5.6
	40-49	-3.2	-7.7	4.0
	50-59	-2.8	-6.2	4.1
	60-69	-2.3	-3.2	6.6
	70 and over	-2.3	-1.5	10.3
All persons		-2.5	-5.5	6.0

a. Persons with 'unknown' sex and age are only included in the calculation of All persons indexes. For more information, see Inclusion of unknown characteristics in [How data are processed \(/methodologies/weekly-payroll-jobs-and-wages-australia-methodology/week-ending-15-october-2022#how-data-are-processed\)](#).

5 year age groups - Payroll jobs

Time series estimates of payroll jobs by 5 year age groups by sex are presented as index values in Table 8 of the Data downloads.

Industry

Payroll jobs

In the fortnight to 15 October 2022, the largest changes in payroll jobs were:

- Retail trade, up 1.3%
- Education and training, up 1.1%

Percentage change in payroll jobs, by industry (a)

	Fortnight (%)	Month (%)	Year (%)
Agriculture, forestry and fishing	0.3	1.0	-2.7
Mining	0.0	0.0	8.2
Manufacturing	0.1	-0.7	-0.6
Electricity, gas, water and waste services	-0.7	-0.8	1.9
Construction	-0.3	0.9	2.6
Wholesale trade	-0.1	-0.8	-0.2

	Fortnight (%)	Month (%)	Year (%)
Retail trade	1.3	0.9	5.8
Accommodation and food services	0.1	-1.9	14.7
Transport, postal and warehousing	0.6	-0.9	1.0
Information media and telecommunications	-0.3	-0.7	13.3
Financial and insurance services	-0.5	0.3	0.8
Rental, hiring and real estate services	0.1	-0.5	2.4
Professional, scientific and technical services	0.9	-0.3	4.3
Administrative and support services	0.9	-0.6	7.9
Public administration and safety	0.2	0.0	1.0
Education and training	1.1	-1.6	7.9
Health care and social assistance	0.3	0.2	4.6
Arts and recreation services	0.4	-0.2	32.4
Other services	-0.2	-0.9	4.3
All industries	0.4	-0.3	4.1

a. Some industries experience pronounced seasonality in either payroll jobs and wages or both. For more information, see Seasonality in [Data variability and revisions \(/methodologies/weekly-payroll-jobs-and-wages-australia-methodology/week-ending-15-october-2022#data-variability-and-revisions\)](#).

Percentage change in payroll jobs by industry (a)

a. Industries ranked by percentage change in the latest fortnight.

Total wages

In the fortnight to 15 October 2022, the largest changes in total wages paid were:

- Information media and telecommunications, down 12.1%
- Mining, down 10.4%

Percentage change in total wages, by industry (a)

	Fortnight (%)	Month (%)	Year (%)
Agriculture, forestry and fishing	0.6	0.6	2.7
Mining	-10.4	-5.8	12.4
Manufacturing	-1.5	-9.5	0.3
Electricity, gas, water and waste services	-8.8	-16.5	6.8
Construction	-0.9	-0.6	5.1
Wholesale trade	-2.8	-5.3	1.1
Retail trade	-3.8	-11.2	7.1
Accommodation and food services	-1.9	-0.3	28.5
Transport, postal and warehousing	-0.9	-4.7	5.0
Information media and telecommunications	-12.1	-20.4	17.9
Financial and insurance services	-8.8	-26.1	1.4
Rental, hiring and real estate services	-3.2	-3.1	3.6
Professional, scientific and technical services	-1.3	-2.8	7.2
Administrative and support services	-0.4	-3.6	8.1
Public administration and safety	-0.5	0.2	3.1
Education and training	2.5	-0.6	8.6
Health care and social assistance	-2.9	-0.6	7.0
Arts and recreation services	-4.0	-3.6	29.3
Other services	-0.8	-1.6	9.9
All industries	-2.5	-5.5	6.0

a. Some industries experience pronounced seasonality in either payroll jobs and wages or both. For more information, see Seasonality in [Data variability and revisions \(/methodologies/weekly-payroll-jobs-and-wages-australia-methodology/week-ending-15-october-2022#data-variability-and-revisions\)](/methodologies/weekly-payroll-jobs-and-wages-australia-methodology/week-ending-15-october-2022#data-variability-and-revisions).

Industry subdivision - Payroll jobs

Time series estimates of payroll jobs by industry subdivision are presented as index values in Table 6 of the Data downloads. For more information on the industry classifications used in this release, see the [Glossary \(/methodologies/weekly-payroll-jobs-and-wages-australia-methodology/week-ending-15-october-2022#glossary\)](/methodologies/weekly-payroll-jobs-and-wages-australia-methodology/week-ending-15-october-2022#glossary).

Private sector industry - Payroll jobs

Time series estimates of payroll jobs by private sector for selected industry divisions are presented as index values in Table 9 of the Data downloads. More information on the sector classification can be found in Updating characteristics variables in [How data are processed](#)

[\(/methodologies/weekly-payroll-jobs-and-wages-australia-methodology/week-ending-15-october-2022#how-data-are-processed\)](/methodologies/weekly-payroll-jobs-and-wages-australia-methodology/week-ending-15-october-2022#how-data-are-processed) and the [Glossary \(/methodologies/weekly-payroll-jobs-and-wages-australia-methodology/week-ending-15-october-2022#glossary\)](/methodologies/weekly-payroll-jobs-and-wages-australia-methodology/week-ending-15-october-2022#glossary).

Industry employment guide

To learn more about the different labour measures available, their purpose and how to use them, see our [Industry employment guide \(/statistics/understanding-statistics/guide-labour-statistics/industry-employment-guide\)](/statistics/understanding-statistics/guide-labour-statistics/industry-employment-guide).

Employment size

The ABS has previously advised caution in using the most recent periods in payroll jobs by employment size indexes, which are subject to higher than usual revisions over a longer period - particularly for small employers. These indexes are more heavily influenced by changes in reporting behaviour and reporting obligations than other indexes, affecting the interpretation of underlying change in labour market conditions. To provide more stability at the end point of these series, a month lag in the reference week is in place.

These estimates present percentage change between the weeks ending 17 September 2022 and:

- 3 September 2022, for fortnight
- 20 August 2022, for month
- 18 September 2021, for year

In the fortnight to 17 September 2022, the largest changes in payroll jobs were:

- 0-19 employees, down 0.5%
- 200 employees and over, up 0.5%

Percentage change in payroll jobs by employment size, for the week ending 17 September 2022 (a)

	Fortnight (%)	Month (%)	Year (%)
0-19 employees	-0.5	-0.5	1.3
20-199 employees	0.0	0.0	11.3
200 employees and over	0.5	0.3	6.2
All businesses	0.1	0.0	6.0

a. Records with 'unknown' employment size are only included in the calculation of All businesses indexes.

For more information, see Revisions in sub-populations in [Data variability and revisions \(/methodologies/weekly-payroll-jobs-and-wages-australia-methodology/week-ending-15-october-2022#data-variability-and-revisions\)](/methodologies/weekly-payroll-jobs-and-wages-australia-methodology/week-ending-15-october-2022#data-variability-and-revisions).

Distribution of characteristics

To aid in the interpretability of payroll job estimates, the following data download contains selected distributions of jobholder and employer characteristics by state and territory.

Records with 'unknown' characteristics have been excluded from the calculation of proportions. For more information on the source, impact and proportion of unknowns, see the Updating characteristic variables and Inclusion of unknown characteristics sections of [How data are processed \(/methodologies/weekly-payroll-jobs-and-wages-australia-methodology/week-ending-15-october-2022#how-data-are-processed\)](/methodologies/weekly-payroll-jobs-and-wages-australia-methodology/week-ending-15-october-2022#how-data-are-processed).
